Portfolio

EDUCATION :

Institute of Technology, Guru Ghasidas ,Vishwavidyalaya, Bilaspur — session (***2021 -25***)
B.Tech(InformationTechnology) — *CGPA:* ***7.2***

TECHNICAL SKILLS AND INTERESTS :

Languages	: JAVA, Python, C++, Java Script, HTML
Developer Tools	: LangChain,Git,GitHub,
Frameworks	: SpringBoot , PyTorch, Hugging Face Transformer
Coursework	: DataStructure and Algorithms, OOPs, Operating System, DBMS , Cyber Security
DataBase	: MongoDB, MySql,

EXPERIENCE :

• Graphic Designer, Google Developers Students Club — ***April 2023***
Tools & Technologies used: Figma, Canva, PremierPro

• GFG PR Team Lead — ***June 2023***
Tech Team Lead and Sponsors Management

PERSONAL PROJECTS

–Android Malware Detection by using Machine Learning — ***feb 2025***
Designed andimplementeda machine learning–basedsystem to detect Android malware by analyzing application permissions, API calls, and behavioral features. Applied feature extraction and supervised learning algorithms to classify benign and malicious softwares and mails with high accuracy.

–Advance Predictive Maintenance strategies by Using Machine Learning and XR Technology — ***feb - 2024***
Developed a predictive maintenance system using machine learning models to analyze sensor data and forecast equipment failures before breakdowns occur. Integrated Extended Reality (XR) technologies to visualize machine health, maintenance alerts, and fault diagnostics in an immersive environment.

–Multi Disease Predict — ***May- 2025***
Built a machine learning–based healthcare application to predict multiple diseases by analyzing patient symptoms and clinical data. Implemented supervised learning algorithms to classify disease risks with Performed data preprocessing, feature engineering, and model training with algorithms such as Logistic Regression, Random Forest, and Support Vector Machine.

–AI Multilingual Voice Translator — ***Aug- 2023***
Developed an AI-powered multilingual voice translation system using speech-to-text, neural machine translation, and text-to-speech technologies. Enabled real-time voice translation across multiple languages with high accuracy, improving cross-language communication. Integrated NLP and deep learning models to ensure low-latency, context-aware, and scalable translation performance.

–AI Assistant — ***Jan- 2026***
Developed an AI-powered assistant using Python with speech recognition and text-to-speech capabilities. Integrated Gemini AI for intelligent responses, system automation for web actions, and computer vision for camera-based analysis. Designed a modular, real-time assistant show casing skills in AI integration, automation, and human–computer interaction.

INTERNSHIP:

Cyber Security Internship at CDAC Noida — ***Aug- 2024***
Completed a 45-days virtual cyber security internship at CDAC Noida, gaining hands-on experience with Google Dorks, Amass, and Nmap for reconnaissance and vulnerability assessment.Performed practical security analysis to identify exposed assets, network services, and potential security risks using industry-standard tools.

Cyber Security Internship at CyberZero — ***May- 2025***
Completed a cyber security internship at CyberZero, gaining hands-on experience in cyber laws, digital forensics, OSINT, and vulnerability assessment techniques. Worked with real-world security scenarios to analyze threats, gather intelligence, and understand modern cybersecurity practices.

ACHIEVEMENTS :

- Among Top 10 Teams in Smart India Hackthon 2023 in Chhattisgarh.
- Participated in Walmart hackathon 2023.
- Participated in Equilibrio hackathon 2022.
